

I couldn't get through it because I couldn't find enough resources on MCP technology, I simply used the Apify API.

If LLM part of the agent can not determine the product, it ask user a few more times.

```
Hangi ürünü aradığınızı tam adıyla yazabilir misin? Örn: 'Logitech MX Master 3S'  
araba dedim ya  
Hangi ürünü aradığınızı tam adıyla yazabilir misin? Örn: 'Logitech MX Master 3S'  
Logitech MX Master 3S
```

If the agent did not find in the first try, it tries a few more times.

```
Verification: False | idx=-1 | No exact match for Logitech MX Master 3S found among the candidates.
